All SKUs

Version 1.0 05/2026

Check Parts: Ensure you have all the parts needed for assembly. The image to the right will indicate the number of legs required for each upholstered piece.

Positioning: Locate the predrilled holes at the bottom of each upholstered piece. The image to the right visualizes where each hole is located.

Screw in Leg: Take one leg and align it with the predrilled hole. Insert the screw into the hole and tighten it by turning it clockwise. Do this until the leg is flush with the upholstered piece.

Repeat: Attach each leg in the same manner, moving in a clockwise direction around the upholstered piece.

Check Stability: Once all the legs are securely attached, gently rock the piece to ensure it sits evenly on all legs.
