Step 2
Slide the metal receiver over the metal post. Press both sides of back firmly downward until locked in place.

Step 1
Please located the hand controller at the beside of metal bracket.

Step3
Locate the power cord C attached to the bottom back and connect to plug D

Step 4
Locate the power cord E attached to the bottom back and connect to plug

Step 5
The Transformer is attached to the bottom of rail and connect to DC Port located at the rear of arm.

Note: Make sure all PLUGS are connected on the product before plugging power cord into power outlet. If not damage can occur.
The USB ports (where applicable) are designed with working voltage of 5V, and can NOT be used to supply power for laptop computers (neither PC or Mac). Plugging a laptop computer to the USB port may end up damaging either the computer or the USB port due to unmatched working voltage.
