**INSTRUCTIONS:**

Once the header is created, proceed to install the rails in the manner shown in figure number 1.

The rail is reversible so you must select the appropriate height before proceeding with the next step, the height is changed by rotating the rail 180 degrees.

Once the rails are in position, proceed to tighten the screws to secure the rails in position.

Attach the central supports to the slat as shown in figure 2 (the central supports can change height).
