HOW TO ATTACH YOUR BEDGEAR SPLIT HEAD FITTED SHEET

Be sure to wash your new sheet set before use for optimal performance.

Lay your BEDGEAR Split Head Fitted Sheet flat on top of your mattress, aligning head and foot.

Starting at the foot of the bed, stretch the sheet over each corner of your mattress.

Raise the bed's base one side at a time. Lift the mattress head and grab the sheet's Powerband strap. Slide the Powerband along the outer length of the mattress.

With the Powerband strap in-hand, locate the snap about halfway down the long side of the sheet on the Powerband and attach the strap to it.

Articulate your mattress down and tuck the elastic under the mattress. Smooth out the surface to remove wrinkles.

Congratulations! You have successfully installed your BEDGEAR Split Head Fitted Sheet!
